RE: Petition for channel allocation

Dear Mrs. Sheuerle;

Enclosed you will find a copy of the materials sent for consideration on a new channel for Lupton, MI. Thank you for your time and consideration on this matter. Please contact me if you have a question concerning this paper work. All technical questions should be directed to Mr. David Robinson our engineer whose number is given on the petition.

Sincerely,

 Dr. Paul E. Heaton

Attn. Kathleen Scheuerle

David Robinson
Engineer: Fundamental Broadcasting Network

May 10, 1996

Attention: Policy & Rules Division - Allocation Branch

The following information is hereby giving for petition of a new commercial channel FM allotment to be used by an educational non-commercial station.

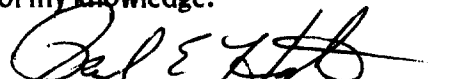

City: Lupton
State: Michigan
Channel: 272
Class: A
Use: Non-Commercial Educational

Statement of Engineering:

1. A study in the reserved educational channels has been performed and only one (1) channel has been determined not to interfere with other FM stations in the area, Enclosure (1). The location, however, was within the distance designated in Part 73.525 (a) (1). A waiver agreement to TV-6 was petitioned to them. This was not acceptable by TV-6 see Enclosure (2). The desired station could not comply with Part 73-525. A request was sent to TV channel 6 asking them to further amplify their position on educational stations attempting to operate in the Northern Michigan area. A Channel 6 representative encouraged the use of a commercial channel due to the small number of available educational channels and the presence of TV-6 in Northern Michigan. See Enclosure (3).
2. Part 73202 indicates that no allocation for Lupton, MI. has been established.
3. A study of the availability of a commercial channel for Lupton, Michigan was performed and a channel does comply with Part 73.207 (b) (1), and (2), 73.208 (a) (1) (i). See Enclosure (4).
4. As determined above, there are no educational channels in Lupton for use.

Statement of True Facts:

The facts contained herein are true to the best of my knowledge.

Dr. Paul E. Heaton

Statement of Agreement to File:

If the allocation is granted, I will file for the channel once notified by the Federal Communications Commission.

Dr. Paul E. Heaton

End of Constraints Study FM Channel 209A

September 8, 1995

Sent Via Fax
AARCOM
Newport, NC

Dear Sir:

Your consulting firm represents a client who wishes to file a construction permit application for channel 209A in Lupton Michigan. The proposed operation is located 79 Km from our WCML TV, channel six, licensed to Central Michigan University. Section 73.525 of the commissions rules provides protection to a channel six licensee for 196 Km. from a proposed operation on channel 209. Central Michigan University does not waive protection from interference offered by section 73.525.

A portion of the WCML TV operating and construction costs were funded by donations from viewers who would be adversely effected by the operation of your clients proposed FM Station. Central Michigan University can not deprive these viewers of their sole source for Public Broadcasting.

Respectfully;

Randy Kapenga
Director of Technical Service

CENTRAL MICHIGAN UNIVERSITY

January 30, 1996

Pastor P. Heaton
Bible Baptist Church
3338 Main Street
Lupton, MI 48635

Dear Pastor Heaton:

David W. Robinson asked for a letter stating the Central Michigan University position on the use of commercial FM Broadcast channels for educational licensing. The reserved, educational, spectrum contains only 20 channels and is directly adjacent to TV broadcast channel six. The small number of available channels and the presence of television channel six in northern Michigan mandate a request to the Federal Communication Commission for the allocation of a commercial channel for educational use.

The University is currently operating two commercial FM channels, in northern Michigan, with educational licenses. We would encourage your pursuit of this solution to your broadcast needs.

Respectfully yours,

Randy Kapenga
Director of Technical Services
Public Broadcasting Network
